

IN THE CLAIMS

1. (Currently amended) Method for external coating of a plastic part that surrounds the armature outlet of a sanitary outlet armature, ~~characterized in that~~ comprising applying at least one layer of an adhesive film or hot-stamping film is ~~applied onto an outside of the plastic part.~~

2. (Currently amended) Method according to Claim 1, ~~characterized in that~~ wherein in order to produce a chromium, aluminum, or similar metallic appearance, the method further comprises forming the at least one layer ~~is formed~~ as a metallic layer in at least one partial area of the plastic part.

3. (Currently amended) Method according to Claim 1 [[or 2]], ~~characterized in that~~ wherein the at least one layer comprises at least one metallic and/or colored layer that is applied onto the outside of the plastic part ~~by means of~~ using an adhesive layer ~~, in particular by means~~ in the form of a heat-sealing adhesive layer.

4. (Currently amended) Method according to Claim 1, wherein one of Claims 1 to 3, ~~characterized in that~~ the at least one layer of the adhesive film or hot-stamping film is applied at least onto a partial area of an outer circumference of the plastic part.

5. (Currently amended) Method according to Claim 4, wherein one of Claims 1 to 4, ~~characterized in that~~ the at least one layer of the adhesive film or hot-stamping film is applied onto the outer circumference of the plastic part so as to wrap around it at least once.

6. (Currently amended) Method according to Claim 1, wherein one of Claims 1 to 5, characterized in that the at least one layer of the adhesive film or hot-stamping film is applied at least onto an end of the plastic part at a flow outlet side.

7. (Currently amended) Method according to Claim 1, wherein one of Claims 1 to 6, characterized in that at least one of the layers applied onto the plastic part ~~[[can be]]~~ is printed on or ~~similarly~~ inscribed.

8. (Currently amended) Method according to Claim 7, wherein one of Claims 1 to 7, characterized in that at least one external transparent layer or protective layer is applied onto the layer, ~~in particular~~ the printed or ~~similarly~~ inscribed layer ~~[[,]]~~ of the adhesive film or hot-stamping film.

9. (Currently amended) Method according to Claim 8, wherein one of Claims 1 to 8, characterized in that the external transparent or protective layer is formed as a protective film.

10. (Currently amended) Outlet part, formed by the method of claim 1 in particular according to one of Claims 1 to 9, that surrounds the armature outlet of a sanitary outlet armature, ~~characterized in that~~ the outlet part is manufactured as the plastic part that bears on its outside, at least in a partial area, the at least one layer of the adhesive film or hot-stamping film.

11. (Currently amended) Outlet part according to Claim 10, ~~characterized in that~~ wherein the at least one layer for producing a chromium, aluminum, or similar metallic appearance is constructed as a metallic layer in at least one partial area of

the plastic part.

12. (Currently amended) Outlet part according to Claim 10, wherein ~~or 11,~~
~~characterized in that~~ the at least one metallic and/or colored layer is applied onto
the outside of the plastic part by ~~means of~~ an adhesive layer, ~~and in particular by~~
~~means of~~ a heat-sealing adhesive layer.

13. (Currently amended) Outlet part according to Claim 10, wherein ~~one of~~
~~Claims 10 to 12, characterized in that~~ the at least one layer of the adhesive film or
hot-stamping film is applied at least onto a partial area of the outer circumference
of the plastic part.

14. (Currently amended) Outlet part according to Claim 10, wherein ~~one of~~
~~Claims 10 to 13, characterized in that~~ the at least one layer of the adhesive film or
hot-stamping film is applied onto the outer circumference of the plastic part so as to
wrap around it at least once.

15. (Currently amended) Outlet part according to Claim 10, wherein ~~one of~~
~~Claims 10 to 14, characterized in that~~ the at least one layer of the adhesive film or
hot-stamping film is applied at least onto ~~[[the]]~~ an end of the plastic part at the
flow outlet side.

16. (Currently amended) Outlet part according to Claim 10, wherein ~~one of~~
~~Claims 10 to 15, characterized in that~~ at least one of the layers applied on the
plastic part ~~[[can be]]~~ is printed on or ~~similarly~~-inscribed.

Applicant: Fabian Wildfang
Application No.: Not Yet Known

17. (Currently amended) Outlet part according to Claim 16, wherein one of Claims 10 to 16, characterized in that at least one external transparent layer or protective layer is applied onto ~~the layer, in particular~~ the printed or similarly inscribed layer [[,]] of the adhesive film or hot-stamping film.

18. (Currently amended) Outlet part according to Claim 17, wherein one of Claims 10 to 17, characterized in that the external transparent or protective layer is formed as a protective film.

19. (Currently amended) Outlet part according to Claim 10, wherein one of Claims 10 to 18, characterized in that the outlet part is formed as a jet regulator housing in which a jet fractionating device and/or a jet regulating device and/or a flow rectifier are provided.

20. (Currently amended) Outlet part according to Claim 10, wherein one of Claims 10 to 19, characterized in that the outlet part is formed as an outlet mouth that can be connected to the sanitary outlet armature, ~~preferably~~ in releasable fashion.
